TOP SECRET BUKAR

The following information is furnished in response to your inquiry on the activities of the 5 large-hatch ships that have made or are now making trips to Cuba after returning to the USSR when the US quarantine was declared.

As a general rule it should be noted that the large-hatch ships used in the movement of military cargoes to Cuba required only 24 - 48 hours to unload these cargoes. Ships loading in Soviet ports require 3 - 4 days on the average to load their cargoes and to take on bunkers.

<u>KASIMOV</u>	22 October -	[REDACTED] going northbound out of the Baltic and presumed to be en route to Cuba.	25X1B0a
	25 October -	[REDACTED] returned to the Baltic.	25X1C
25X1D1a & NSA	28 October -	[REDACTED] Leningrad 30 October.	25X1D & NSA
	7 November -	sailed Leningrad	25X1C
	9 November -	[REDACTED] to Cuba.	25X1C 25X1C
	<u>Remarks:</u>	The five day interval between 25 and 30 October was sufficient for this ship to have reached Leningrad, or an intermediate Baltic port, and to have offloaded its cargo. The interval between 30 October and 7 November was almost twice the normal period required to load Soviet vessels.	25X1D1a & NSA

25X1D

25X1D

25X1D

Remarks:

The 4-day period in Kaliningrad was ample  
time to offload its cargo. This ship  
spent approximately five days loading in  
Leningrad which is about the average time  
required.

Remarks:

This ship, because of the time elapsed be-  
tween passing the Bosphorous northbound  
and arriving at Odessa, may have off-  
loaded at another Black Sea port such as  
Nikolaev. The one-day period required to  
load heavy steel plates and billets  
amounting to 4 200 tons is not regarded  
as unusually fast.
